

What is claimed is:

1. An adjuvant for accelating enzyme activity including many kinds of amino acid contained indispensable amino acids and many kinds of specific metallic cations characterized that organic substances and/or organic compounds including a small quantity of inorganic subastances and showing a general formula; $[C_aH_aO_cN_dP_eS_f]$ (but a-f indicating a positive number respectively), are contacted with catalaizers comprising microorganism group in nature, clay catalizer, enzymes nd water under atomospheric pressure, and proceeded oxidation-reductions through aerobic environments from anaerobic environments to yield the adjuvant.

2. An adjuvant for accelating enzyme activity in claim 1 wherein the oraganic substances and/or organic compounds are biomass materials.

3. An adjuvnt for accelating enzyme activity in claim 1 wherein the organic substances and/or organic compounds are bioresidures.
